

Wall Hook DEER

Maximum load capacity: 10 kg

Package Contents

× 1

Wall hook DEER

× 3

Screws

× 2

Universal plugs
(5x30 mm)

× 1

Wooden part

Assembly Process

1

Mark the holes

Using a spirit level, mark two holes horizontally on the wall with a pencil. The distance between the holes should be 1.5 cm.

2

Drill holes and insert plugs

Drill straight into the walls at 90° angle. Once the holes are drilled, insert the wall plugs firmly into each hole.

3

Mount the wooden part

Secure the wooden part to the wall using the two larger screws (3.5 × 45 mm), driving them through the wooden part into the plugs.

4

Attach the wall hook

Place the wall hook DEER onto the mounted wooden part. Insert the small screw through the hole on the bottom of the hook and tighten it to secure the hook in place.
